Locating Vocational Education Materials

Finding curriculum materials, lesson plans, classroom activities, and other instructional materials in vocational education can be complex and time consuming. This Digest updates earlier ones (Wagner 1994, 1996) and includes a variety of sources—commercial, nonprofit, state, and Web based—for instructional materials. In includes information about finding materials in ERIC and through networking and lists some sources for borrowing and buying materials.

ERIC

The ERIC database is a good source of information about instructional materials. A search will lead you to curricula, project descriptions, lesson plans, classroom activities, task lists, and other resources. The database also includes materials on how to develop curricula. You can search ERIC on the World Wide Web (<www.eric.ed.gov>) and at most university, state, and resource center libraries.

Networking and Listservs

Networking is an excellent way to find information and materials. Talking to colleagues about their successes and failures in finding materials and their most and least favorite resources provides educators with valuable leads. Listservs such as CAREERTECH <careertech@lists.acs.ohio-state.edu>, maintained by the National Dissemination Center for Career and Technical Education, are excellent for getting recommendations for materials. Subscribers are very willing to share their expertise and experiences. Other listservs of interest include those for business education <nbea-l@vml.cc.uakron.edu>, technology education <technology-edu@unix.g.ubc.ca>, school-to-work <stw-lc@ed.gov>, and training and development <trdev-l@psu>.

World Wide Web

The World Wide Web is another great source of information for vocational/technical educators. Many commercial and nonprofit publishers—some of which listed here—have websites that describe their products. Vocational Education Resources (<pegasus.cc.ucf.edu/~sorg/vocation.html>) consists of annotated links that will lead you to a wealth of resources.

The following list of agencies that offer materials for loan and/or sale is by no means exhaustive. Rather, it is intended to help educators get started in their search for resources. It includes commercial publishers, curriculum laboratories, curriculum consortia, and state and national resource centers.

Commercial Publishers

American Association for Vocational Instructional Materials
220 Smithonia Rd
Winterville GA 30683
800/228-4689; fax: 706/742-7005
